Special Imports

RWFA has the ability to source items not available in Australia without having to resort to minimum manufacturing quantities (often one tonne). Delivery times are always better than the standard manufacturing schedule- usually 7 - 9 weeks from receipt of order.

Almost any fastener that is available on the North American can be brought in in around 20 kg lots. Many metric items common in Europe but not imported into Australia can also be sourced in very manageable quantities.

Items brought in include:

- Imperial structural to USA standards
- Imperial grade 5 hex bolts
- 316 CSK socket screws
- KEPS nuts
- M14 flange nylocs
- Small diameter UNF half nuts
